

Fabrication Technician - ALine

We are seeking an entry-level Fabrication Technician to support our engineering team with fabrication of prototype medical diagnostic components based on microfluidic technology.

This is a technical position that requires attention to detail and ability to work with your hands. Candidates will enjoy a fast paced work environment, and are willing to learn our process for the custom fabrication of microfluidic devices. This role is based in Rancho Dominguez, CA. Compensation is \$12-18/hour depending on experience. Candidates must be able to provide proof of eligibility to work in the United States.

Company

ALine provides engineering and manufacturing services to support customers developing cutting edge products for the life science and medical diagnostics market. The company was founded in 2003 and focuses on high quality, rapid turnaround production of microfluidic devices under a quality management system. Our team includes engineers and technicians from a variety of backgrounds (Biomedical, Mechanical and Electrical Engineers).

Role

- Fabrication of high quality medical components
- Operate under an ISO 13485:2016 quality management system
- Support in process development and troubleshooting
- General equipment maintenance

Requirements

- Ability to multi-task in a fast-paced environment and meet tight deadlines.
- Show attention to detail and accuracy.
- Work independently and/or collaboratively as part of a team.
- Have the ability to work well under pressure and adapt to changing priorities/schedules.
- Excellent communication and written skills.
- Excel and MS Office
- Work eligibility in the United States.
- AutoCAD and SolidWorks is a plus
